## DETAILED ACTION

### *Remarks*

In response to applicant's Amendment, dated January 21, 2003, the examiner acknowledges the cancellation of claims 6 and 7. Claims 1-5 and 8-12 are pending.

The examiner acknowledges the corrections of the objections related to the Drawings and Specification (i.e., abstract) set forth in the Office Action mailed August 14, 2002.

Regarding the 35 U.S.C. 102(e) rejection of claims 1-12 as being anticipated by Nakazato, et al. (US 6,236,820), the applicant makes the argument that one of the optical boxes of the present invention (claim 1) is "stacked *directly* on a second on of the optical boxes." (Emphasis added by applicant). The applicant, further, argues that in Nakazato the specification may use the term "stacked" to described the arrangement of image forming units; however, "it is apparent from the Figures that each image forming unit 104K, 104C, etc., is simply lodged in a respective portion of structure member 202." The examiner maintains that Nakazato does teach "wherein one of said optical boxes is stacked directly on a second one of said plurality of boxes" as can be seen in Figures 1A, 9, 12, 14, 21, 31. (Note: The Figures noted are not exclusive but representative, and other figures of Nakazato also disclose the claimed invention.

Thus, the examiner has considered the applicant's arguments in light of the amended claims and maintains the rejection.

Regarding the prior art made of record and not relied upon listed in the Office Acton mailed August 14, 2002, the applicant makes the argument that "the other art of record fails to reveal anything which, in Applicant's s opinion, would remedy" the argued deficiencies of Nakazato. The examiner notes that Obu clearly discloses an optical box that is stacked directly

on a second optical box, and include alignment / mount parts (ref.# 51, 52) which facilitate the “direct” stacking of one unit on top of another.

### *Claim Objections*

1. Claim 10 is objected to because of the following informalities:

It appears that the word “bodies was omitted between the words “bearing” and “corresponding.” It appears that the limitation should be “comprising a plurality of image bearing [bodies] corresponding respectively to said plurality of optical boxes.” Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-5 and 8-12 are rejected under 35 U.S.C. 102(e) as being anticipated by

Nakazato, et al. (US 6,236,820).

Nakazato (US 6,236,820) discloses all the structures set forth in the claims. Regarding claim 1, Nakazato (US 6,236,820) discloses “...an image bearing member (Fig. 9, ref.#s 1, 8K, 8C, 8M, 8Y); and a plurality of optical boxes (Fig. 9, ref.# 104K, 104C, 104M, 104Y), each of

Art Unit: 2851

said optical boxes containing at least: a light source (column 21, line 63); deflecting means (Fig. 9, ref.#s 106K, 106C, 106M, 106Y) for deflecting light emitted from said light source; and a lens (Fig. 9, ref.# 108K, 108C, 108M, 108Y, 112K, 112C, 112M, 112Y), arranged to image light deflected by said deflecting means onto said image bearing member; wherein one of said optical boxes is stacked directly on a second one of said plurality of optical boxes.”

Regarding claim 2, Nakazato (US 6,236,820) discloses “...wherein said one optical box has a positioning portion for receiving said second of said optical box to form a stack.” (Fig. 12, ref.#s 280U, 280D)

Regarding claim 3, Nakazato (US 6,236,820) discloses “...wherein said one optical box and said second optical box are fixed to each other by an elastic member, or by adhering or welding.” (Column 9, line 20)

Regarding claim 4, Nakazato (US 6,236,820) discloses “...wherein said optical box has an engaging portion for engaging with said second optical box.” (Column 5, lines 41-44)

Regarding claim 5, Nakazato (US 6,236,820) discloses “...wherein said engaging portion has a notch portion.” (Column 5, lines 41-44)

Regarding claim 8, Nakazato (US 6,236,820) discloses “...wherein said one optical box has an engaging portion for engaging with a main body of said apparatus.” (Column 5, lines 35-44)

Regarding claim 9, Nakazato (US 6,236,820) discloses “...wherein said engaging portion has a notch portion.” (Column 5, lines 41-44)

Art Unit: 2851

Regarding claim 10, Nakazato (US 6,236,820) discloses "a plurality image bearing [bodies] (Fig. 9, ref.# 8K, 8C, 8M, 8Y) corresponding respectively to said plurality of optical boxes (Fig. 9, ref.# 104K, 104C, 104M, 104Y)."

Regarding claim 11, Nakazato (US 6,236,820) discloses "...wherein an interval between said one optical box and second optical box (Fig. 9, ref.# 104K, 104C, 104M, 104Y) is equal to an interval between two of image bearing members (Fig. 9, ref.# 8K, 8C, 8M, 8Y)."

Regarding claim 12, Nakazato (US 6,236,820) discloses "...wherein said optical boxes correspond respectively to a plurality of images having different colors." (Column 6, lines 11-15)

### *Conclusion*

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

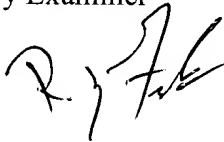

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
